

GRANT

IQ

Federal Grant Intelligence
for Mississippi Health Departments

BUILT FOR 82 COUNTIES

LIVE DATA

The letters 'MS' in a dark blue, bold, sans-serif font are centered within a white square. This square is framed by two concentric black borders. The entire graphic is set against a light beige background with a subtle grid pattern.

MS

THE PROBLEM

#50

Mississippi ranks last or near-last nationally in:

- Diabetes rate
- Obesity rate
- Uninsured adults
- Social Vulnerability
- Health outcomes

Understaffed

3-4 person depts can't track dozens of federal programs

Complex Rules

HPSA scores, MUA status, poverty cutoffs. Complex and disconnected

Scattered Data

CDC, HRSA, SVI, FQHC. Fragmented across government systems.

Near-Misses Missed

One failing criterion goes unnoticed. Funding lost.

The money exists. The eligibility exists. The grants go unclaimed.

What If We Had a System That...

82

Mississippi
counties covered

6

live government
APIs merged

50+

health + demographic
fields per county

11

curated grant
programs

300+

live Grants.gov
opportunities scanned

6

AI analysis
modes

THE SOLUTION - GRANTIQ

"Tell any Mississippi county exactly which federal grants they can win right now, and what to do to win the ones they're one step away from."

AUTOMATIC ELIGIBILITY

Integrates HPSA scores, MUA status, poverty rates, rurality, and SVI indicators into automated county profiles.

LIVE GRANT MATCHING

Live Grants.gov Intelligence | 300+ real-time federal opportunities automatically retrieved, matched, and ranked.

AI-POWERED APPLICATION

6 AI Intelligence Modes powered by real county CDC data for needs analysis, gap detection, and strategy planning.

DATA ARCHITECTURE: 6 LIVE APIs

CDC PLACES

50+ health rates: diabetes, obesity, uninsured

CDC ATSDR SVI

Social Vulnerability Index (4-theme breakdown)

HRSA PRIMARY CARE

Shortage score 0-25; FTE + underserved pop

HRSA DENTAL HPSA

Dental provider shortage designation status

HRSA MENTAL HEALTH

Behavioral shortage (80/82 MS counties)

HRSA MUA / FQHC

Medically Underserved Areas + center locations

COUNTY PROFILE

50+ fields merged by FIPS key

- Cached 24 hrs
- No DB needed
- Atomic updates
- Real-time join

System ensures High Availability + Data Integrity across all rural territories

GRANT MATCHING ENGINE: TWO LAYERS

ENGINE 1

CURATED MATCHER

300+ grant programs

ML-modeled rules

- Eligibility score 0-100
- Community need score 0-100
- Overall match = 40% eligibility + 60% need
- Near-miss detection
- Corrective action advice

+

ENGINE 2

LIVE GRANTS.GOV

12 parallel keyword searches

`api.grants.gov/v1/api/search2`

- 300+ opportunities scanned
- 21 CFDA number mappings
- 15 keyword signal patterns
- Real deadlines + award \$
- Graceful degradation built in

Results merged → deduplicated → ranked by match score → served to county dashboard

WHY WE BUILT THIS

THE HUMAN COST

Every unclaimed grant is:

- A clinic that doesn't open
- A provider not recruited
- A prevention program not run
- A family without access to care

Mississippi's rural poor have the worst health outcomes in the country and the least capacity to navigate complex federal grant systems.

GrantIQ closes that gap.

THE CAPACITY GAP

A 3-person county health dept cannot:

- Track programs across 7 agencies
- Cross-reference 6 eligibility systems
- Write grant narratives for every opportunity
- Know when they're 1 step away

GRANTIQ MAKES IT INSTANT

- Select county → see eligibility in seconds
- Matched grants with award amounts
- Near-misses with corrective action
- AI writes the needs statement draft
- All from real CDC + HRSA data

Empowering rural communities through data-driven grant intelligence

COMPETITIVE LANDSCAPE

FEATURE	GRANTS.GOV	GRANT DATABASES (Foundation, Instrumentl)	GRANTIQ ✦
Live grant listings	✓	✓ paid	✓ free
Auto eligibility check	✗	✗ manual	✓ automatic
Real health data (CDC/HRSA)	✗	✗	✓ 50+ live fields
Near-miss detection	✗	✗	✓ + action steps
Need scoring 0-100	✗	✗	✓ per grant
AI application drafting	✗	some \$\$\$	✓ 6 modes free
Geographic equity map	✗	✗	✓ all 82 counties
Cost	Free	\$200-500/mo	Free

AI ANALYSIS — 6 MODES

01

Needs Statement

Full grant application narrative using real county CDC data, ready to paste into Grants.gov

02

Grant Strategy

Ranked action plan: which 3 grants to apply for first, why, and in what order

03

Gap Analysis

For near-misses: exact corrective steps, timeline, and which agency to contact

04

Report Generator

County health status summary with benchmarks vs state and national averages

05

Narrative Writer

Full application narrative draft for a specific named grant — tailored to NOFO language

06

Competitive Analysis

How this county ranks against all 82 MS counties on key eligibility indicators

Every prompt injects real county data – the model narrates facts, never invents statistics

DEMO WALKTHROUGH — 8 STEPS

01

Landing Map

All 82 MS counties colored by SVI vulnerability score

02

Select County

Click county on map or search by name / FIPS code

03

Dashboard

Estimated funding, HPSA, SVI, poverty — live from APIs

04

Matched Grants

Every program they qualify for, ranked by match score

05

Near Misses

One action needed to unlock each near-miss grant

06

Health Profile

30+ indicators vs national averages, HRSA designations

07

AI Analysis

Needs statement streams in 30s using real county data

08

Equity Map

Regional clustering view — compare all 82 counties

Interactive 8-step journey from high-level state maps to detailed county-level AI analysis

</> TECH STACK

FRONTEND

Next.js 14 · React · TypeScript · Tailwind CSS

App Router · SSR · Client components · IBM Plex fonts

VISUALIZATION

Recharts · React Leaflet · Custom SVG charts

Interactive MS map · county boundary GeoJSON · choropleth

DATA LAYER

6 Government APIs · Next.js fetch caching · FIPS key merge

24hr cache · zero database · always-current · graceful degradation

MATCHING ENGINE

Custom TypeScript scoring · Grants.gov API · CFDA lookup

40% eligibility + 60% need · near-miss detection · SSE streaming

AI LAYER

OpenAI GPT-4o · Streaming SSE · Data-grounded prompts

6 modes · ~\$0.01/request · no hallucinated stats · 30s generation

DEPLOYMENT

Vercel · Edge runtime · Public APIs · No DB required

~1 min from npm install to running · zero infrastructure

ROADMAP — WHAT'S NEXT

NOW

v1.0

- 82 MS counties live
- 6 API data sources
- 11 curated + 300+ live grants
- AI brief generation
- Interactive equity map

NEXT

90 DAYS

- User accounts + saved analysis
- PDF export of county briefs
- Email deadline alerts
- Expand CFDA rule coverage
- Multi-county comparison

LATER

6 MONTHS

- Expand to all 50 states
- Grants.gov pre-fill integration
- Application outcome tracking
- Coalition builder tool
- Role-based access (staff/writer)

Strategic roadmap for expanding grant intelligence capabilities across Mississippi.

GRANT IQ

Mississippi's federal grant intelligence platform.

Built with real data. Free. Open.
